

# Cow puppet

## Supplies:

- Cow puppet pattern (below)
- Markers or crayons
- Brown lunch bags
- Scissors
- Glue

## Here's what you do:

Make an enlarged copy of the cow pattern for each child. Have the kids cut out and color their cows. To make the puppet, glue the head of the cow to the flap of the bag. Then, glue the cow's body under the flap.

Talk to the children about where milk comes from and why milk is important to drink. Encourage the children to make a story about their cows. Split them up into groups or encourage them to write. Try to give them a theme such as how would the cows save the world if the milk supply ran out.
